Dear Sir/Madam,

I am writing this report to express my ideas concerning the school museum. I will analyze the situation and explain how to improve it.

It is no secret that our school museum contains a large amount of information and objects. Such an impressive collection is the reason I am writing this report, because it is not used effectively.

First of all, the absence of any engagement of our museum at History lessons is a missed opportunity. Secondly, the fact that only students of our lyceum have an access to the broad collection of information is frustrating for people who want to know more about the past, but can not due to this limitation.

Considering all facts above, here are my recommendations on how to increase the museum's output to the education. Firstly, by using the museum resources at History lessons we can rapidly increase students' academic performance and enhance their knowledge. Secondly, if we get rid of the limitation mentioned above (concerning the "students only" rule) our museum will be able to provide information to the broader amount of people. With the public access the popularity of our school will grow too.

So, in conclusion, I want to say that I do hope you will agree with my point of view and our museum will experience great changes soon. I am looking forward to find out your opinion on this matter.

Yours faithfully,

Denis
